### What are the risks of investing?

#### Risk Indicator for Norfolk Mortgage Trust

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

**To help you clarify your own attitude to risk you can seek financial advice or work out your risk profile at [www.sorted.org.nz/calculators/investment-planner](http://www.sorted.org.nz/calculators/investment-planner).**

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the annualised returns data for the 5-year period ending 31 March 2020. Whilst risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.
